## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6, 7 and 15-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation of "a lead penetrating the circuit board." It is unclear whether the "lead" is the same as the "contact" recited in claim 1.

Claim 15 recites the limitation "the cartridge of electronic parts" in line 3 of the claim. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 5, 8-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Bethrum (US 5,563,770).

Regarding claim 1, Bethrum discloses a connector comprising: a plug housing 12, 14 including a back face and holding at least one contact 44, 46; a cover housing 62

combined with the plug housing; and a circuit board 50 held by the plug housing, the cover housing and the at least one contact, the circuit board electrically connected to the apparatus <sup>the</sup> contact.

Regarding claim 4, Bethurum discloses the circuit board being connected with the plug housing such that the circuit board covers an open portion of the plug housing, thereby forming a closed cross-section.

Regarding claim 5, Bethurum discloses a unit including the plug housing, the circuit board and a contact are unitarily assembled into the cover housing.

Regarding claim 8, Bethurum discloses a lock section 77 configured to lock both the plug housing and the cover housing, which are combined with each other, and is arranged in a space surrounded by the plug housing and the cover housing.

Regarding claims 9 and 11, Bethurum discloses the invention substantially as claimed but does not disclose a cartridge of toner. It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Regarding claim 10, Bethurum discloses a connector comprising: a plug housing 12, 14 including a back face; a cover housing 62 combined with the plug housing; and a circuit board 50 held by both the housings; wherein the cover housing includes a protruding section (at 62) configured to attach to the cartridge of electronic parts (using an adhesive, for example).

Regarding claims 12 -14, Bethurum disclose the circuit board including a memory.

Claim 13 has not been given patentable weight since the "information" is not positively recited.

***Allowable Subject Matter***

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 6 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 15-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: Claim 2 recites the limitation of the plug housing and cover housings being slidable relative to each other in a direction parallel with the surface of the circuit board. Prior art teaches slidable covers, but not the plug housing and cover being slidable. Claim 6 recites the limitation of the lead penetrating the circuit board. Prior art generally teaches the leads contacting surface traces of the PCB, and not penetrating. Claim 15 positively recites a cartridge. This limitation is neither anticipated by nor obvious over

the prior art of record, since the prior art connectors with similar structures are IC cards that would not be combined with a cartridge.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
